

The Donwell Company: A Chemours™ Licensed Industrial Applicator

The LIA Program

The Chemours™ Licensed Industrial Applicator (LIA) Program is a global network of companies with extensive knowledge and experience in recommending and applying Teflon™ industrial coatings and who are known for the quality of their workmanship. For over 50 years, the LIA program has been a differentiator in the coating marketplace and remains the mark of a quality coater.

Benefits of Using an LIA to Coat Your Parts:

- **Experience:** You can rely on the decades of experience of LIA's to ensure that the correct Teflon™ coating is applied according to Chemours™ specifications. LIA's are also adept with troubleshooting and solving coating problems.
- **Capability:** LIA's have a wide array of equipment to apply liquid and powder Teflon™ coatings to a variety of parts.
- **Quality:** LIA's display the highest level of quality control throughout the entire coating process. With inspection of incoming parts, control of coating thickness, proper cure, and final testing, LIA's consistently keep quality a top priority.
- **Confidence:** Feel confident that the right coating is being applied in the right way to your part.
- **Connection:** LIA's are kept abreast of new technologies and techniques from Chemours and maintain a full inventory of Teflon™ products.

The Donwell Company's Capabilities Include:

liquid & powder coatings • paint stripping • sand blasting • dip spinning • clean room • etching • grit blasting
